X3100
CCTV USB Joystick Controller

Designed for IP Video Surveillance Systems

The NG Systems X3100 USB joystick controller is designed specifically for IP video surveillance systems and features a sturdy, 3-axis, industry standard joystick and 21 user-defined pushbuttons ergonomically arranged to suit many video applications.

The keyboard's sturdy mild-steel construction allows for single-handed joystick control and the intuitively placed push-buttons enable the keyboard to be operated without taking your eyes off the screen.

The X3100 is powered directly from the PC's USB port and is automatically installed by the Windows XP operating system.
